Professional Summary

Cloud & DevOps Engineer specializing in cloud infrastructure and end-to-end automation, with hands-on experience architecting CI/CD pipelines across 3+ production-style projects. Proven expertise in AWS, Docker, Kubernetes, Terraform, and GitHub Actions, with strong command of CI/CD design, container orchestration, and monitoring using Prometheus and Grafana.

Education

B.Tech in Computer Science and Engineering 2023–2027
Malla Reddy University, Hyderabad, Telangana

Intermediate Education 2021–2023
Sr Junior College, Hyderabad, Telangana

Skills

Cloud Platforms: AWS (EC2, EKS, ECS, S3, IAM, VPC, RDS, Route 53, CloudFront)

CI/CD: GitHub Actions, Jenkins

Infrastructure as Code (IaC): Terraform, Ansible

Containers & Orchestration: Docker, Kubernetes, Helm

Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch

Programming & Scripting: Python, Bash

Version Control: Git, GitHub

Experience

AWS Cloud Club – Malla Reddy University Hyderabad, India
Technical Lead Sep 2025 – Present

- Led technical initiatives as Technical Lead, mentoring **100+ members** in AWS cloud computing through structured, hands-on learning sessions.
- Designed and delivered hands-on workshops on core AWS services (**EC2, IAM, S3**) and CI/CD fundamentals, driving practical adoption of cloud and DevOps skills across the club.

Projects

E-Commerce Microservices — AWS DevOps Pipeline GitHub
Cloud-native CI/CD pipeline on AWS EKS — Docker, Kubernetes, Helm, Trivy, GitHub Actions

- Automated CI/CD pipeline for 11 Spring Boot microservices using GitHub Actions, Docker, Trivy security scanning, and SHA-based image tagging to Amazon ECR.
- Deployed a 3-node Amazon EKS cluster via Helm umbrella chart, managing 5 stateful components with persistent AWS EBS storage.
- Enforced a Build-Once-Deploy-Same-Artifact strategy with zero manual rebuilds, monitoring cluster health via Prometheus and Grafana with Kubernetes LoadBalancer routing.

NotesWay – Academic Notes Management Platform GitHub
Production-grade 3-tier application on AWS — Terraform, Docker, ECS, ECR, GitHub Actions

- Architected a three-tier notes platform using React.js, Python, and MongoDB Atlas, supporting role-based access across 3 user roles.
- Provisioned scalable AWS infrastructure including ECS, ECR, VPC, IAM, S3, and CloudFront using Terraform, with CloudWatch integration for centralized logging and container health monitoring.
- Built a CI/CD pipeline using GitHub Actions with a self-hosted runner and OIDC authentication, cutting manual deployment steps from 6 to 2.

Certifications

- AWS Academy Graduate - Cloud Foundations (Amazon Web Services Training and Certification)
Issued Oct 2025
